

Foscam Product Lifecycle Statement (EOL and EOS)

Dear Valued User,

Thank you for your continued trust and support for Foscam! We remain committed to providing high-quality network video solutions and strictly upholding our privacy and data protection commitments. To ensure our products continue to meet the latest technology and cybersecurity standards, we regularly evaluate and update our product lineup. As part of this process, certain products will eventually enter the End of Life (EOL) and End of Support (EOS) stages.

1. Lifecycle Stage Definitions

1.1.EOL (End of Life – Discontinued Production)

When a product enters its EOL date, it means the product has officially ceased production (and/or sales). During the period following the EOL date, we will continue to provide essential support services, including:

- Technical support and troubleshooting
- Security-related firmware updates to address vulnerabilities

Products after the EOL date will no longer receive new features, but we will ensure they remain stable and secure for continued use.

1.2 EOS (End of Support)

When a product reaches the EOS date, Foscam will discontinue regular support services for it, including:

- Discontinuation of technical support (or limited assistance when resources allow)
- Discontinuation of feature and compatibility updates

2. Lifecycle Timeline Policy

- After a product is discontinued, Foscam will publish an official EOL announcement on the website at least three months in advance, and provide information about recommended replacement products.
- For at least three years following the EOL date, Foscam will continue to provide technical support and firmware updates.
- To ensure ongoing protection, Foscam extends its security coverage to address critical vulnerabilities for EOS products beyond the three-year commitment period.
- Warranty terms are subject to the policies of the sales channel or distributor.

During the period following the EOS date, because spare parts and replacement units will no longer be available, some product functions may be limited.

In the event of any conflict or inconsistency between this policy and any prior policies or communications, this policy shall prevail.

3. Customer Support

If you have any questions regarding EOL/EOS products or this lifecycle policy, please feel free to contact us at:

support@foscam.com

We sincerely apologize for any inconvenience caused by product discontinuation or the end of support. As a company dedicated to IP camera technology, Foscam will continue to innovate and upgrade our products to provide a safer and more intelligent experience.

Please refer to the attached document for the detailed list of products and their corresponding EOL/EOS timelines.

Thank you for your understanding and continued support!

FOSCAM Team
