Setting Up Your Foscam Security Camera

1 *Getting Started*

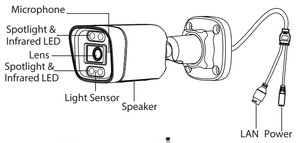

Package Contents

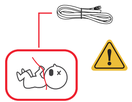

Safety Tips

- Please change the camera's password regularly, using a combination of numbers, letters and special characters.
- We recommend that you regularly update your camera with the latest available software and firmware to ensure the best experience with your camera.
- Please ensure that the proper power supply is used before using the camera.
- Do not disassemble, repair or modify the product.
- Do not use the product if the casing has been broken. Danger of electric shock.
- Please install the camera securely using the screws provided.
- Change the default port in your camera to a port in the higher range to improve the security of your connection.
- To avoid the risk of fire or electric shock, please keep your camera connectors in a cool, dry place.
- Please keep the camera out of reach of small children.
- Operating Temperature: -20℃ ~50℃(-4℉~122℉).

2 *Physical Description*

The cords on this product are a potential strangulation hazard. For child safety, please keep these cords out of the reach of children.

3 Setting Up Your Camera: Wired Connection via the Foscam App (Recommended)

Before You Get Started

Scan the QR code below to download and install the Foscam APP.

GET IT ON Google Play

Available on the App Store

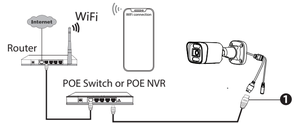

To ensure a smoother video experience on your smart phone, it is recommended that your smart phone meet the following specifications:

- iOS: version 11 or higher.
- Android: 5.0 or higher, using a device with a Graphics Processing Unit (GPU).

Note: For the best experience, please update the APP to the latest version!

Wired Connection

1. Connect the camera to your POE Switch or POE NVR with an Ethernet cable, and please wait for a few seconds until hearing the "**Wired connection succeeded**".
2. Make sure your smart phone is connected to the same WiFi network as the camera.

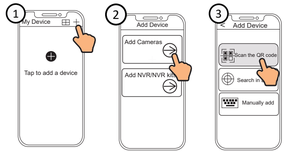

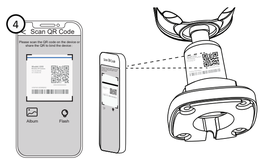

Tips: Please make sure that the smartphone and camera are on the same Wi-Fi.

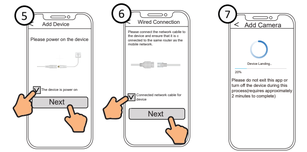

3. Open the Foscam APP and please register a Foscam account, or sign in if you have one already.

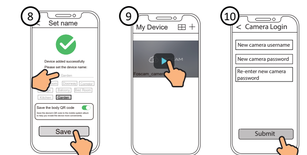

4. Follow the steps below:

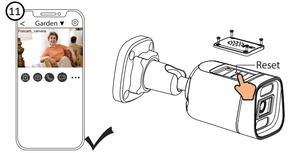

11

Note: If the adding process fails, please reset your camera and try adding again according to the above method.

4 PC Access Your Camera

Foscam VMS

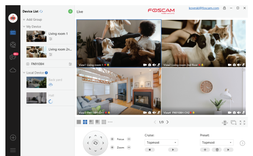

Foscam VMS is a new tool for PCs. It does not require plug-ins and is compatible with Windows & Mac, supporting all Foscam HD cameras and up to 36 cameras at the same time. If you would like to manage multiple cameras, we suggest you install Foscam VMS. You can download the "Foscam VMS "Windows version from **foscam.com/vms**, and can download the "Foscam VMS" Mac version from the APP store:
https://apps.apple.com/cn/app/foscamvms/id1521202507?mt=12

Note: For the best experience, please update Foscam VMS to the latest version!

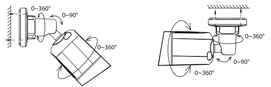

Add the IP Camera

1. Run Foscam VMS, then create a local administrator account or a Foscam account and login.
2. Tap the "+" icon on the Foscam VMS and follow the setup wizard to add your camera.

Please visit **foscam.com/downloads** to view the user manual and for additional detailed steps.

5 Hardware Installation

Point the camera at the desired location and use the screws provided to mount it.

Please Note:

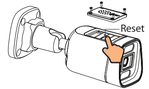

Ensure that rain or water will not reach the connector ports at the end of the tailcable. These connectors are not weather-resistant.

6 Important Notice

Camera Username & Password

The camera username & password are used to access and manage your camera. Having a strong password can significantly improve the security of your camera.

If you have forgotten either of them, please press the "Reset" button.

Press the "Reset" button and hold it for more than 3~5 seconds

Storage Media

Your camera supports cloud, NVR (Network Video Recorder), and Micro SD card (supports FAT32 and exFAT format) storage formats.

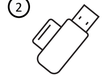

cloud Storage | NVR | Micro SD card (FAT32 & exFAT)

How to format Micro SD card, please follow the steps below:

1

2

3

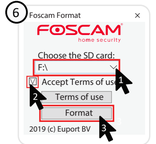

4 Scan the QR code below to download the "FoscamFormat " Tool

foscam.com/downloads/app_software.html

5 Open the "FoscamFormat " Tool

7 Product Performance

Power Supply: DC 12V 1.0A 12W

8 FAQs

Q1: Does it come with power supply? how to connect to power?

A: It does not come with a power supply. You must add a POE (Power Over Ethernet) injector. Power is then supplied from the POE injector to the camera through the ethernet cable.

Q2: Does the camera require wifi ?

A: It's a POE camera. Power Over Ethernet. It requires an ethernet cable that delivers power and a signal to your LAN. You need a switch or router capable of delivering POE.

Q3: Specification of Ethernet Cables that PoE Cameras Require

A: PoE cameras support T-568B connectors and CAT5, CAT6, CAT7 with8PIN Ethernet cable.

Q4: Can this be powered with a battery pack in case of power outage or tampering?

A: It's powered through the Ethernet cable from your NVR. If you put your NVR on UPS the camera will stay powered as long as the NVR is powered on.
